RE: SQA-V Letter of Recommendation to Medical Electronic Systems

Dear Eric,

I would like to advise you that our facility has been using the SQA-V for over two years to test patient's semen analysis routinely in the laboratory. We find that it is the instrument of choice for this analysis and are happy with the performance.

I am happy to write this letter of recommendation as we are satisfied with BOTH the SQA-V instrument and the technical support provided by Medical Electronic Systems.

Sincerely, *Rebecca Helwig*
