RE: SQA-V Gold" Device

The SQA-V is an automated system for doing semen analysis. It removes the subjective differences between Medical Laboratory Scientists using a manual technique. The system has defined quality control, proficiency testing, and the turnaround time is 90% faster than a manual method. SQA-V adds markedly increased quality and value to the semen analysis test.

We have used the SQA-V for over 10 years and wouldn't want to be without this instrument in our laboratory.
