Re: SQA-Ve and E-Sperm Analyzer for Stallions

Founded in 2005, Eurogen is a French company located in Carentan (near Omaha Beach - Normandy) that offers a full range of reproductive services to the competition horse industry.

With more than 500 references in our catalogue, among them some major jumping stallions known around the world, we offer professional breeders or top level riders a complete package of services for the collection of their stallions, preparation of straws, storage and shipment of doses around the world. To see the full range of our services please visit us at [www.eurogen.fr](http://www.eurogen.fr)

Based on our substantial experience, including more than 1,250 stallion collections in 2014 alone, we decided to invest in the innovative SQA-Ve technology in 2010.

The SQA-Ve was unveiled in France during the prestigious « Salon du Cheval » exhibition which was held in Paris. The system won the innovation prize at the meeting in 2008 and knowing how difficult it is to obtain recognition by the association's committee of experts, we were interested in evaluating the system at our facilities.

After a very intense month of testing, based on fresh semen and on QC of frozen straws, we decided to adopt the SQA-Ve in our routine practice.

Today, this system gives us the ability to:

- Be very effective, precise and repeatable in the control of fresh semen preparation and the QC of existing lots of straws.
- Provide a service to our customers when they want to acquire straws from other centers.
- Compare in a very accurate way, different freezing protocols when dealing with problematic stallions.
- Deliver a valid certificate of QC when exporting doses to our customers around the world.

I would definitely recommend this technology to any equine AI center, even where difficult sample handling conditions exist. This system also facilitates very high throughput during the QC processes without compromising the quality of any sample measured.

I would be glad to provide any additional information upon request.

Sincerely,

Benoit LEPAGE  
General Manager.
